

CHILDREN RAISING AWARENESS AT COMMUNITY AND POLICY LEVELS ON DOMESTIC VIOLENCE AND OTHER ISSUES

Category: Children advocating, mobilizing, raising awareness, informing and communicating

Asia and the Pacific: Myanmar

‘Save the Children in Myanmar’ has launched two programs involving children's direct participation. At family and community levels children are raising awareness on issues of corporal punishment and domestic violence and helping improve the relations between children and their guardians through safe participation spaces. At the policy level, children are empowered to influence change and engage with decision-makers on an online platform and speak up about freedom of expression, protection from violence, and their rights.
