

# AFGHAN GIRLS CREATING ALTERNATIVE SCHOOLS TO FIGHT FOR THEIR EDUCATION

Category: Children advocating, mobilizing, raising awareness, informing and communicating

Middle East and North Africa: Afghanistan

In Afghanistan, girls are demanding their right to education. The government has placed strict bans on girls' education, but that has not stopped them from seeking out and continuing their education. Young girls are helping women in their community create alternative schools and they are bridging the information with their peers. They take precautions to protect and support each other and their human right to education.
