

MOBILIZING AGAINST SEXUAL AND GENDER BASED VIOLENCE

Children advocating, mobilizing, raising awareness, informing and communicating.

Sub-Saharan Africa: Liberia

"Since the start of COVID-19 in Liberia, we've mobilized and are still mobilizing Liberian communities to strongly condemn the act of sexual & gender based violence, especially rape crimes. We have also been involved in COVID-19 awareness to stop the spread of the pandemic and distributing sanitary materials, food and non food items to households, especially with children and elderly people. We observed many children selling nose masks in the street while they didn't have on one for their own safety and protection per the health regulations".

Brighter Initiatives for Revitalization & Development (BIRD-Liberia)
