

PHYSICAL AND MENTAL HEALTH CARE FOR CHILDREN AND ADOLESCENTS DURING TIMES OF COVID-19

Children building capacities and researching

Asia and the Pacific: India

HOC has actively participated in understanding the difficulties faced by the children during the Covid-19. With the support of terre des hommes-india programme and Volkswagen Workers Council, we sensitized 5000 vulnerable children on Covid-19, distributed nutritious food, masks and counselling sessions to children who are in depression and anxiety. Prepared some indoor gaming material to refresh the mind of the children to come out of the trama. Special emphasis has given to nearly 2000 adolescent girls and provided with hygiene kits, nutritious food and sanitary pads to take care of their menstrual hygiene during these difficult period of Covid-19.

Many children from the marginalized sections could not participated in the online classes provided by the schools and colleges because parents are not in a position to provide android phones, tabs along with internet connection. Which leads the children become dropouts.

Hands Of Compassion (HOC)
