

YOUNG PEOPLE AND CHILDREN WORKING TOGETHER

Children building capacities and researching

Asia and the Pacific: India

We are working in far flung remote villages bordering to Myanmar where all the villagers are in the below poverty line. Due to Covid-19 pandemic, schools were closed down and thus village children were deprived of their right to education, and there was no alternative arrangement from the government at all, and the villagers cannot afford private coaching. Thus we mobilized the village youth to take the initiative to start coaching centre for the village children free of cost (maintaining SOP). And viola it works! The village youth willingly agreed. Now all our partner villages have free coaching centre for the children.

We have also formed children groups in our partner villages creating a platform to unlock their capacities to contribute to their well being through opinion formation, expression and action.
