

CHILDREN AND YOUTH LOOKING TO PREVENT VIOLENCE ONLINE

Children building capacities and researching

Europe and Others: Luxembourg

At the moment we mainly get in contact with kids and youngsters through daycare facilities, schools, youth houses or similar structures. We call these meetings kids and youth panels. The aim is to give youngsters and kids the possibility to express their views, exchange knowledge and experiences concerning their use of online technologies and contribute to the development of awareness raising actions, tools and material.

At the moment we are working on a training concept for educators and teachers where the aim is to inform them and explain different media trends among children and youngsters. (social networking, gaming, influencers, etc.) Here it is very important to us to see if what we define as trends is effectively in line with reality. This year during covid we also tested our virtual DigiRallye with different daycare facilities.
