

# CHILDREN DELIVERING MESSAGES FOR OTHER CHILDREN

Children building capacities and researching

Latin America and the Caribbean: State of Palestine

Children produced videos about the pandemic - children as journalists, delivering messages to other children.

Children finalized and discussed the Child Led Report on child rights violations. This is part of the child-led monitoring and reporting groups as child rights defenders. Child groups in different governorates collected and analyzed data on child rights, draft reports, developed initiatives and held accountability sessions with decision makers accordingly.

Research and Advocacy with Children: Children of the Child led Monitoring Groups and the child council through Save the Children's partner DCI submitted a position paper to the Ministry of Education regarding distance learning based on a child-led survey they conducted.
