

CHILDREN AND YOUNG PEOPLE TOWARDS PEACEBUILDING

Children building capacities and researching

Sub-Saharan Africa: Democratic Republic of Congo

"Our initiative has impacted the community especially the youth for about 6 years ago now. The greatest success that we are proud of ourselves is the fact that most young people can access education through our program of literacy. More than 120 youth have benefited from our accompaniment to afford school, but also we provide them with toolkits for youth, peace and security to help them being transformed into future peacebuilders.

Since COVID-19 started things have been so hectic in the functionality of our activities, but our team didn't give up to devote themselves accompanying youth in our community. Since Covid-19 started with have impacted youth providing them with supplies needed in the center where they are hosted, the supplies were contained within health materials, food as well as technological kits for our peace and conflict resolution program.
