

# ADOLESCENTS SUPPORTING CHILDREN'S MENTAL HEALTH

Children engaging and supporting their peers,  
including reaching the most vulnerable

Asia and the Pacific: Bangladesh

Since, Dhaka Ahsania Mission (DAM) works with marginalized community; during covid 19 situations we found it is impossible to engage and work with these people virtually.

Covid 19 situation is very new for all of us. We tried to address the problems of children and young people within our regular best practices. We are providing awareness and psycho-social counselling among the adolescents. That has given mental strength to the children and young people to cope up with the challenges of covid 19. We are also addressing the violence against children at the community level ; our community mobilizers are engaged with the mitigation and arbitration process at the community and thus we are trying to ensure child protection.
