

CHILD-CENTERED SOCIAL ACCOUNTABILITY ONLINE

Children engaging and supporting their peers,
including reaching the most vulnerable

Asia and the Pacific: Bangladesh

Child-centred social accountability online. A Facebook platform was created for the most marginalised children aged between 13-18 years. Through a 'Facebook event' dialogues are taken forward between children and duty bearers on services offered as COVID-19 response, as well as any other issues the children want to raise. On this page, children can make comments, suggestions and share their observations regarding their own or friend's sufferings, needs, condition of their families and on the response by their local government in general.

Also a study is being taken forward on the most marginalized children.
