

CHILDREN SUPPORTING EACH OTHER THROUGH VIRTUAL MEANS

Children engaging and supporting their peers,
including reaching the most vulnerable

Asia and the Pacific: Bangladesh

Children helping others: We worked mainly online via WhatsApp- Facebook and Zoom. We asked the children to give their impressions of what was happening. We assigned them tasks to do at home, via the network and with their peers. We have helped and supported them in their requests for help. Making them feel an integral part of an international group and therefore they felt important in carrying out what we asked for eg: Help the parents, Help a friend virtually, Involve other children.
