

# CHILD-LED INTERVENTIONS USING DRAMA TO ADDRESS GBV

Children innovating, creating and expressing

Latin America and the Caribbean: Honduras

In Honduras, a child-led intervention uses drama to help prevent GBV, a critical problem faced by girls in the country: “In response to this problem that Honduran youth experience daily, we are generating a positive impact in the communities of Honduras to ensure that women, girls and young people can prevent different forms of violence. Our work focuses on using theatre to transmit why it is important to report, raise voices, seek justice, so as not to continue being victims”.
