

ADOLESCENTS LEADING THE WAY THROUGH RADIO

Children innovating, creating and expressing

Sub-Saharan Africa: South Sudan

In South Sudan, we are producing COVID-19 relevant youth-led radio programs and drama skits that will be broadcasted nationally. Our adolescent radio show Youth Talk (Lugara Shabab) is incorporating segments that look at COVID-19 from a youth perspective, including impacts on access to education, friends, and social protection. To make sure that those without access to a radio set will listen, speakers mounted on moto-taxis are touring strategic locations home to hard-to-reach populations in Juba.
